

## QUALITATIVE ANALYSIS OF INTERVIEWS

February / March 2012

- *Partner: Cooperativa sociale La Comunità*
- *Target group: YOUNG PEOPLE*

### 1. Analysis of local context concerning labor market and social policies

Based on the analysis carried out in Autumn 2010 on the opportunities offered by the labor market, the “Link” has chosen to undertake a web radio laboratory, in collaboration with the “Jeans” and the radio network of the school magazine “Zai Net” (cooperative Mandragola).

### 2. Beneficiaries' knowledge about labor market opportunities

Low level of initial knowledge of the beneficiaries, mostly school students, about the opportunities offered by the labor market.

### 3. Language skills and qualifications of beneficiaries

The group chosen for the laboratory comprises mostly young Italian and some citizens of Albanian origin, Indians, Moroccans and Ecuadorians.

### 4. Level of social and working inclusion of beneficiaries

The beneficiaries have a good level of social inclusion and are all school students.

### 5. Life quality level of beneficiaries as well as their professional satisfaction

The average standard of living is high. The group consists of adolescents who have not yet dealt with work experience.

6. Level of beneficiaries' satisfaction of community services: strengths and weaknesses identifies

Less than half of the project beneficiaries were referred by social services. The collaboration with the network of social services took over the course of the project.

7. Level of beneficiaries awareness concerning their social and political empowerment

Given the young age of the participants at the workshop, awareness of their emancipation is rather low.
